

**AMENDMENTS TO THE CLAIMS**

The listing of claims below replaces all prior versions of claims in the application.

1-6. (Cancelled)

7. (Currently Amended): A multi-layered heat-shrinkable film for wearing the outer surface of a container comprising:

a base film having one edge portion and another edge portion, wherein:

the one edge portion and the another edge portion of the base film are overlapped so as to obtain a tubular label;

the one edge portion and the another edge portion of the base film are sealed in a center overlapped portion;

the base film is composed of at least three layers comprising:

front-back film layers each composed of a resin composition (1); and

an intermediate film layer composed of a resin composition (2), wherein:

an overcoat layer formed of acrylic resin, urethane resin or polyamide resin is provided on a principal surface of a front film layer of the multi-layered heat-shrinkable film;

the overcoat layer is provided on the entire surface of the front film layer except for the portion corresponding to the center overlapped portion;

the resin composition (1) comprises cyclic olefin-based resin of from 55 to 95 mass % and linear low-density polyethylene of from 45 to 5 mass %; and

the resin composition (2) comprises propylene- $\alpha$ -olefin random copolymer of from 95 to 55 mass % and cyclic olefin-based resin of from 5 to 45 mass %, or comprises: a resin composition of from 95 to 55 mass % mainly composed of the propylene- $\alpha$ -olefin random copolymer; and the cyclic olefin-based resin of from 5 to 45 mass %.

8. (Original): The multi-layered heat-shrinkable film according to claim 7, wherein an innercoat layer is provided on a principal surface of a back film layer of the multi-layered heat-shrinkable film, the principal surface being opposite a surface facing the intermediate film layer.

9. (Original): The multi-layered heat-shrinkable film according to claim 7, wherein the linear low-density polyethylene is metallocene catalyst-based linear low-density polyethylene.

10. (Original): A container comprising:  
a container body; and  
a label comprising a multi-layered heat-shrinkable film according to claim 7, the label being heat-shrunk onto the container body.

11-14. (Cancelled)

15. (New): The multi-layered heat-shrinkable film according to claim 7, wherein the overcoat layer is formed of acrylic resin.
